per cents can be placed almost imme diately—the greater part of them (it is hoped all) in the home market. There is no reason why the United States Govern-ment should not borrow as cheaply as KENTUCKIANS ought to have learned by this time that the nation is in carnest in carrying out its reconstruction measany of the smaller and oppressed govern-ments of Europe, many of which, limited in territory and with not a tithe of the reures-and yet that community seems to furnish more outrages upon_colored citizens, and greater violations of law, than any of the States in the South, unless it be South Carolina. Even colored men engaged in the humble occupation of carriers there. We can point without thought form the mails are beset and mobbed, and the Postmaster General has been computed by the mails are beset and mobbed, and the Postmaster General has been computed by the mails are beset and mobbed, and the Postmaster General has been computed by the mails are beset and mobbed, and the Postmaster General has been reduced \$204.754.413. and the Postmaster General has been compelled to withdraw the mails from the Louisville and Lexington railroad until as we are by time further and forther repelled to withdraw the mails from the these riotous demonstrations cease. moved from the cause of the debt which The outside world marvels much to see the high-spirited Kentuckian dispute with a negro the means of earning bread for himself or family—and are not content to the content of the content able to comprehend a prejudice which loan free of tax, will, wherever the tax on able to comprehend a prejunice which would close alike the highest profession and lowest fields of labor to deserving ies, be equal to seven per cent, on bond black men. Every man, according to his and mortgage. Insurance companies, for ability, is entitled to an equal field, and an equal chance in life. The social problem is no problem at all. In the end every citizen takes rank for what he really are entitled to the thanks of the country is, and not for what he assumes to be. is, and not for what he assumes to be. The whites in old Kentucky should be above fear in a fair competition with the lately down-trodden and oppressed blacks.

The whites in old Kentucky should be above fear in a fair competition with the lately down-trodden and oppressed blacks. The secretary of the Treasury, as he would have been held responsible had there been a different result.

THE first number of Mr. TILTON'S newspaper, The Golden Age, is at hand. It is Dispatch from Washington, dated Monday, an interesting and attractive sheet. The an interesting and attractive sheet. The Golden Age promises to hold a peculiar place in journalism. It will be a paper of moral ideas without being sectarian. It is to be open to all kinds of political ideas as well as religious—a sort of crucible in which every living topic of the the constant of the mean property of the constant times may be tried. Able correspondents | the new loans, necessary to be placed by will contribute to its columns, and editor and correspondents alike will say what they think without fear of offending sect or party. Its columns are free to all types of opinion, as Mr. Tilton says, to "orthodox and heterodox, Republican and Demodox and heterodox, Republican and Denoted Cratic, Christian and Pagan," with this very wholesome restriction: "But this right of free speech can belong, in a newspring the property of the market in stimulating business and giving busyancy to prices. These influences were, chiefly, the action of the property of the pr paper, only to people who have something paper, only to people who have something to say, and know how to say it." The enterprise has been favorably received by the press of the country, and we see no sarily be thrown on the side of higher the press of the country, and we see no reason to doubt that its success is already

COMMANDER SELFRIDGE, of the steamexpedition in search of a route for a ship-canal across the Isthmus of Darien, has written a letter, under date of February 9th, in which he says: "I am quite sangu-ine that I have found a practicable and profitable route for a canal." The one which he supposes practicable is by the Atrato and Cacarica rivers. The former he says is navigable for the largest ships-So is the Cacarica for twelve miles, which reduces the length of the line to less than fifty miles. Commander Selfridge also states that he has completed all his arrangements for the Atlantic slope, and that at the date of writing he was on his way for the Gulf of San Miguel to start the work from the Pacific side.

By the passage of a recent act through Congress the civil service is somewhat affected. A provision authorizes the President to prescribe such rules and regula-Mysterious Explosions in a Tunnel. tions for the admission of persons into the civil service as will best promote its efficivil service as will best promote its efficiency and ascertain the fitness of each nel about eight miles from Middletown, candidate in respect to age, health, char-acter, knowledge and ability for the posi-red in the tunnel on Wednesday, and the tion he seeks. To carry out this object the President is authorized to employ. About three months age, when driving

the President is authorized to employ suitable persons to conduct such inquiries, to prescribe their duties and to establish regulations for the conduct of persons who may receive appointments in the civil service.

A MILK dealer in Maine is the fortunate possessor of an exceedingly intelligent horse and dog. He obtains a portion of the milk he sells from a neighbor living about half a mile distant. Each day he harnesses his horse to the milk wagon, of nytro giverine. A mass of rock stretchharnesses his horse to the milk wagon, puts in the cans, and throws the reins over the dasher. His large Newfoundland dog then steps into the wagon, and the horse starts for his destination. land dog then sees the best of the horse starts for his destination. Reached there, the dog announces the arrival, the cans are filled, the horse turns carefully around and trots home. The animals have conducted the milk business on this principle for some time past, and have never yet met with an accident.

constantly taking place since that time, and it has been necessary to board up the entrance to the tunnel to keep back the cager throng of curious people. The rocks are thrown down from the rock, and A CORRESPONDENT of the Scientific American writes that he has seen a steam boiler advertised which saves 33 per cent. of thel; a valve which saves 15 per cent; a governor which saves 10 per cent; a cut-off which saves 10 per cent; a dire raisetu) of the oreast. A noise that occasioned by tearing a heavy piece of cloth is first heard. This tearing lasts from a quarter to a half minute, and then come the final explosions of varying intensity. Cubic yards of rock are moved from their places, and other rocks are broken to fragments. No smell or vapor accompanies. cut-off which saves 10 per cent.; a.fre grate which saves 20 per cent.; metal packing and damper regulator which saves 13 per cent.; and a lubricator which will save 1 per cent.—making in all a saving of 101 per cent. Combing all these improvements, an engine would, he thinks, run itself, and produce an additional one per cent. of fael, which might be used for domestic purposes.

run itsel, and notate a per cent of fuel, which might be used for domestic purposes.

To dodge the Civil Rights bill, the tickets issued for the New Orleans Opera House are inscribed: "Contract between the Opera Association of N. O. and the holder of this ticket: It is agreed, and this ticket is sold with the understanding that the controller shall have the right to refuse admission or to expel the holder.

the holder the opinion of the engineer that the explosions may be consequent on water pater traing the rock, causing expansion of the particles. There is, however, no excess of water in these parts. In many cases the explosions seem to come from the interior of the rock, which is not only broken, but shattered. The workmen were driven out of the tunnel on Wednesday, you may have her, and don't you know some likely young man who will take the other."

The London fire brigade.

The London fire brigade is as particular to prevent damage by water as by fire, and in 1870 used an average of only 5,000 gallons of water in extinguishing each of 276 serious and 1,070 slight fires.

It cost to dig the cellar under the New York Postoffice and wall it up, from \$300,000 to \$1,000,000. This is an official statement made in the House of Representatives.

DR SCHENCK ADVISES CON-

D. R. SCHENUS. ADVISES CONSUMPTIVES TO GO. 20 FLORIDA IN WINTER.
Having for the last thirty-five years devoted my whole time and attention to the study of lung diseases and consumption, I feel that I understand fully the course that ought to be pursued to restore a tolerably bad case of diseased lungs to be lithy soundness. The first and most important step is for the patient to avoid taking cold, and the best of all places on this continent for this purpose in winter, is Florida, well down in the State, where the temperature is regular, and not subject to such variations as in more Northern latindes. Thattae is a point I can recommend. A good hotel is kept there by Teterman. Last winter I saw several persons there whose lungs had been badly diseased, but who, under the healing influence of the climate and my medicines, were getting well.

One hundred miles further down the river is a point which I would prefer to Palaika, as the temperature is more even and the air dry and bracing. Mellonville and Enterprise are luctued there. I should give a decided preference to Mellonville. It is two miles from tver or lake, and it seems almost impossible to take cold there. The tables in Thorida might be better.

House-Furnishing Goods Melionville. It is two miles from river or lake coland it seems almost impossible to take colthere. The tables in Florida might be better
and patients complain at times, but that is a good
sign, as it indicates a return of appetite, and
when this is the case they generally increase it
fiesh, and then the lungs must heal.

Jacksonville, Hibernia, Green Cove, and man
other places in various parts of Florida, can be
asfely recommended to consumptives in winter

Meconsories explain on ser that patients an

Secretary Boutwell has heard to-night

will be preferred to any others.

The several influences previously no

prices; and secondly, the extraordinary ease in money which has induced pur-chases of bonds by bankers who gener-

ally employ their balances on call loans. The Treasury programme for March, an-

sects of the new loan, and it seems now

has been in a state of excitement for sev-

thrown a distance of twenty feet down

raised up on the breast. A noise like that

accompanies.

These phenomena have only been observed in the west end of the tunnel, in a

other places in various parts of Florida, can be eafely recommended to consumptives in whiter. My reasons far eaying so are that patients are less liable to take cold there than where there is a less even temperature, and it is not necessary to say that where a consumptive person exposes himself to frequent colds he is certain to die shortly. Therefore my advice is, go well down into the State out of the reach of prevailing cast winds and fogs. Jacksonville, or almost any other of the localities I have named, will benefit those who are troubled with a torpid liver, a disordered stomach, deranged bowels, sore throat or cough, but for those whose lungs are diseased a more southern point is carnestly recommended.

elphia, every week, where I saw and ex lon an average five hundred patients a A practice so extensive, embradae as

slonally in New 107k, Bosson, a law and examined on an average five hundred patients a week. A practice so extensive, embracing every possible phase of lung disease, has enabled me ounderstand the disease fully, and hence, my cantion in regard to taking cold. A person may take vast quantities of "Schenick's Pulmonic Syrup, Scaweed Tonic and Mandrake Pills," and yet die if he does not avoid staking cold.

In Florida, nearly everybody is using Schenck's Mandrake Pills, for the climate is more likely to produce billious habits than more northern latitudes. It is a well established fact that natives of Florida rarely die of consumption, especially those of the southern part. On the other hand, in New England, one-third, at least, of the population, die of this terrible disease. In the Middle States it does not prevail so largely, still there are many thousands of cases there. What a wast per centage of life would be saved if consumptives were as easily alarmed in regard to taking fresh cold as they are about scarlet fever, smell pex, do. But they are not. They take days. They pay no attention to it, and hence it lays the formulation for another and another still, and the garden of the streng and the produce of the would and they are reduced the formulation for another and another still, and the large of the streng and another still, and the garden of the streng and another still and they are affected. My savice to persons whose lungs are affected.

to be very generally anticipated that the five per cent bonds will be successfully negotiated within a reasonable time. The Treasury Department has issued a statecure.

My advice to persons whose lungs are affected even slightly is, to lay in a stock of Schenck'. Pelmonic Syrup, Schenck's Seaweed Tonic and Schenck's Mandrake Pills and go to Florida. ment showing the amount of the several classes of United States debt at its maximum in July. 1865, to have been \$2,755,195; at the beginning of President Grant's administration, \$2,401,309; and om March 1, 1871, \$2,283,145, or about \$500,000,000 less than at the close of our war, six years ago. The exhibit is certainly a very strong one to send abroad as an evidence of the spirit which exists in this country in regard to paying off our national obligations.

Pills is necessary. My object is to give tone to the stomach—to get up a good appotite. It is always a good apput when a patient begins to grow hungry. I have hopes of such. With a relish for food and the grainfaction of that relish cames good blood and with it more flesh, which is closely followed by a healing of the lungs. Then the coupl loosens and abutes, the creeping chills and clammy night-sweats no longer prostrate and annoy, and the patient gets well, provided he avoids taking cold.

Now there are many consumptives who have

Then the cough loosens and aontes, the creeping chills and clammy night-aweats no longer present and annoy, and the patient gets well, provided he avoids taking cold.

Now there are many consumptives who have not the means to go to Florida. The question may be asked, is there no bope for sail. Certainly there is. My advice to said is in the continuous properties of the means to go to Florida. The question may be asked, is there no bope for sail. Certainly there is. My advice to said is in the continuous properties of the continuous

of nytro glycerine. A mass of rock stretching down the whole width of the tunnel, about fifteen feet high, was thrown out. Six of the workmen and the foreman were the bench. They were considerably bruised and scratched, but no lives were lost or bones broken. Explosions of less intensity have been

Boston and New York, but continue to see pattents at my office, No. 13. N. SIXTH Street, Philadelphia, every Saturday from 9 A. x to 3 F. x. Those who wish a thorough examinatism with the Respirometer will be charged five delhars. The Respirometer will be charged five delhars. The Respirometer delares the exact condition of the lungs, and pattents can readily learn whether they are curable or not. But I desire it distinct by understood that the value of my medicine depends entirely upon their being taken strictly according to directions. In conclusion, I will say that when persons take my medicines and their systems are brought into a nealthy condition thereby, they are not so liable to take cold, yet no one with diseased lungs can bear a sudden change of atmosphere without the liability of greater or less irritation of the broachial tabes.

Full directions in all languages accompany my medicines, so explict and clear that any one can use them without consulting me, and can be bought from any druggist.
